WHAT IS AN EDI ?

What is an EDI ?

Automated information exchange between several third parties, via standardized files. This exchange will contain information automatically generated, sent, known and integrated, with a minimum of human intervention.

Exchanges can take place with different stakeholders. They can include :

- Internal EDI
- Carrier EDI
- Customer EDI

SECURED

QUICK WAY

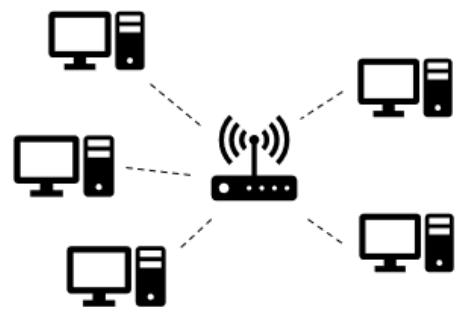

PRODUCTIVITY

RELIABLE

DIFFERENT EDI TYPES AVAILABLE

TWO SERVICES AVAILABLE

It depends on the customer's need !

Standard EDI service

Offer proposed by our company, with different flows available.

The customer therefore adapts to our system's requirements

Specific EDI service

Used when there are **specific needs, or special communication** with the customer.

Format of sending EDI to be defined, a standardized format may be recommended depending on the flow.

DIFFERENT MESSAGES TYPES SENDING

Transport Request

Acknowledgement of receipt

Purchase Order

Customs

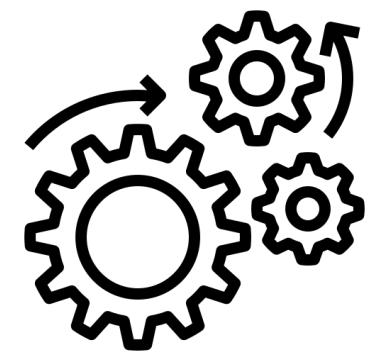

Invoicing

Document

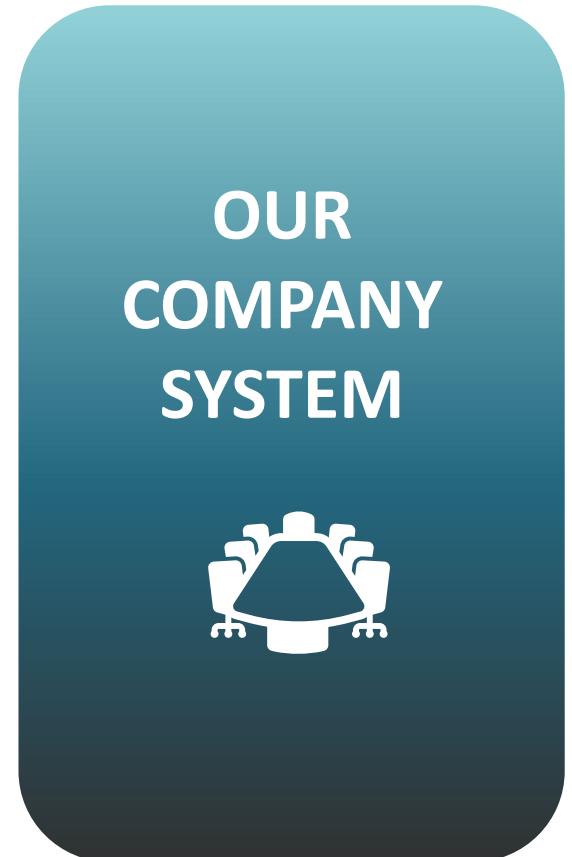

Milestones

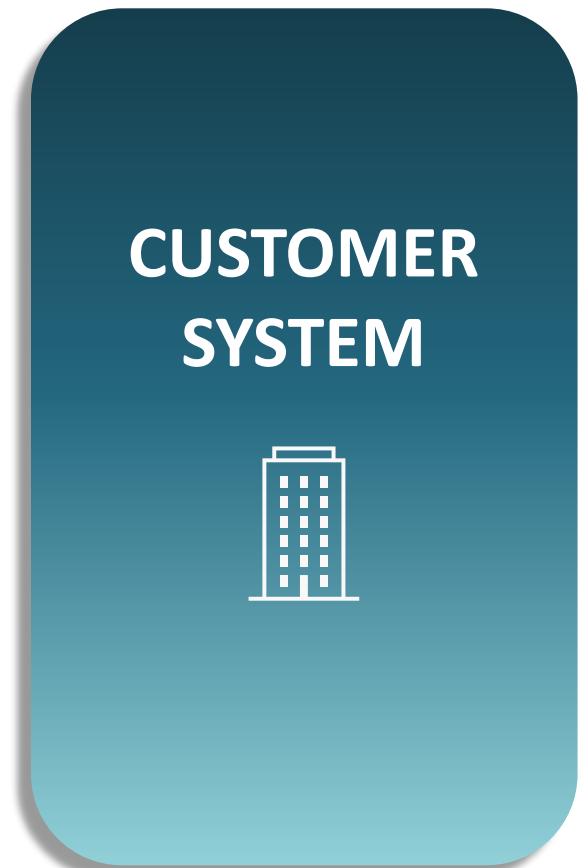

FUNCTIONING OF EDI ACCORDING TO FLOW

EXPORT EDI FLOW

Information send by EDI

 The frequency of sending the EDI flow is an important consideration.

Information integrated and processed

IT CAN BE

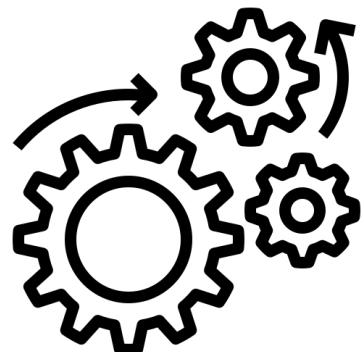

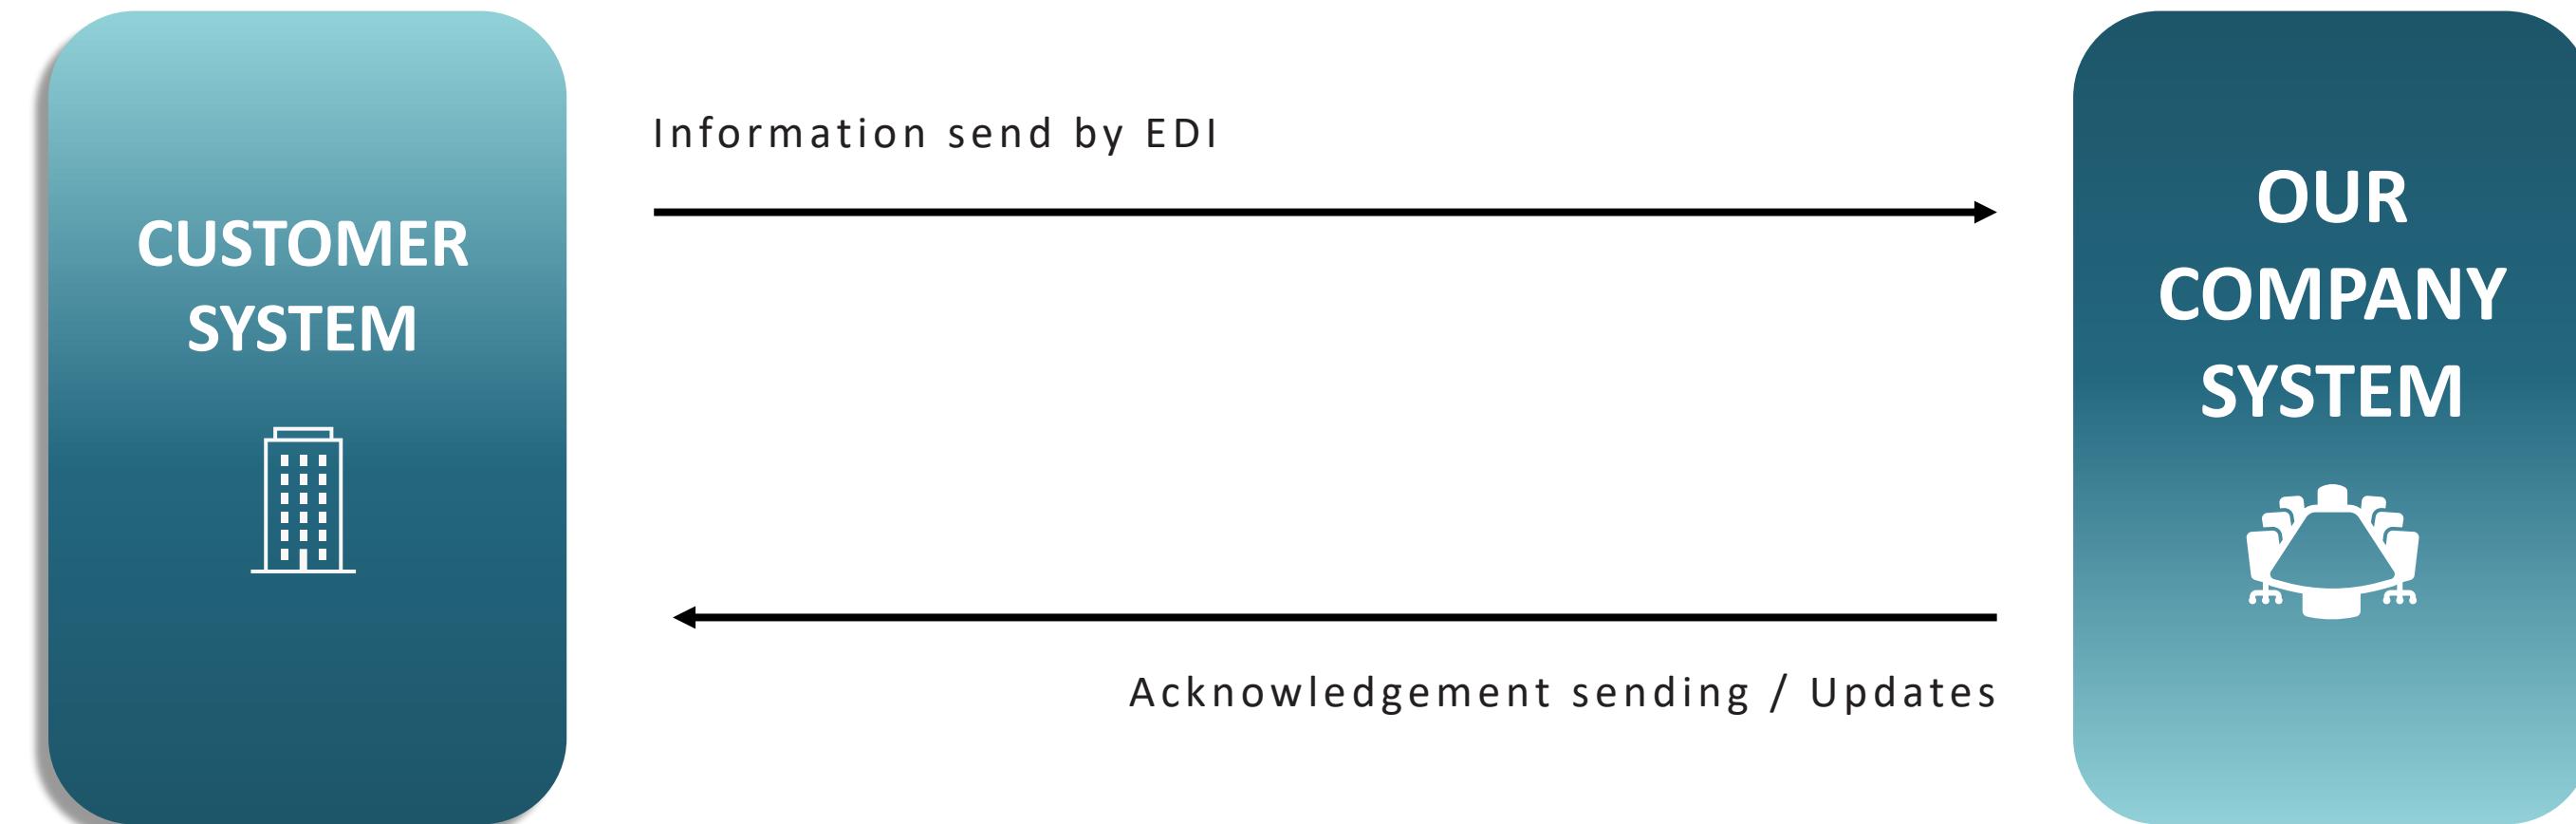

- *Transport Request status update*
- *Purchase order update*
- *Transport milestones status*
- *Invoicing*
- *Export document*

IMPORT EDI FLOW

The information exchange protocol must be established upstream.

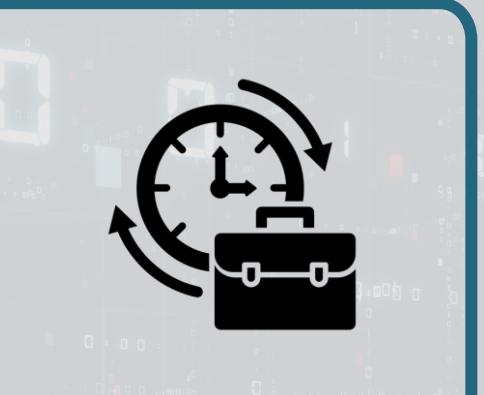

BENEFITS AND ATTENTION POINTS OF EDI

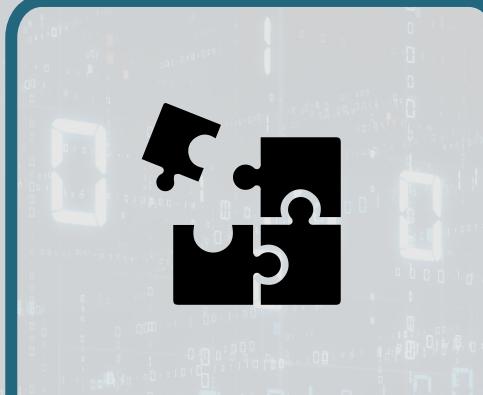

BENEFITS OF AN EDI

Reduces working time

Complete the information only at the **time of data entry**. The data is directly integrated into the systems

Improving the integrity of information

Reduces **manual data entry errors, discrepancies and misinterpretations**

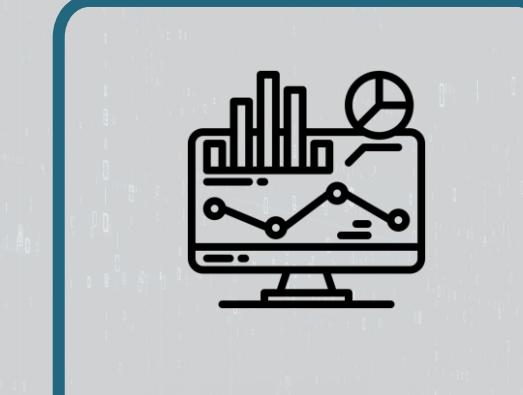

Improves the response time

Increased speed of document transfert.

Cost saving

Minimizes administrative tasks and reduces paper consumption.

Better monitoring and management of the activity

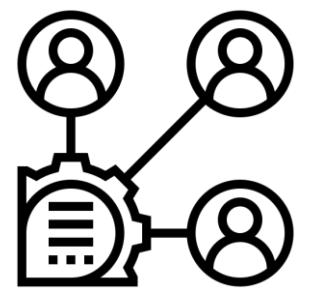

Customer loyalty, customized solution according to stakeholders.

ATTENTION POINTS

Internet-dependent

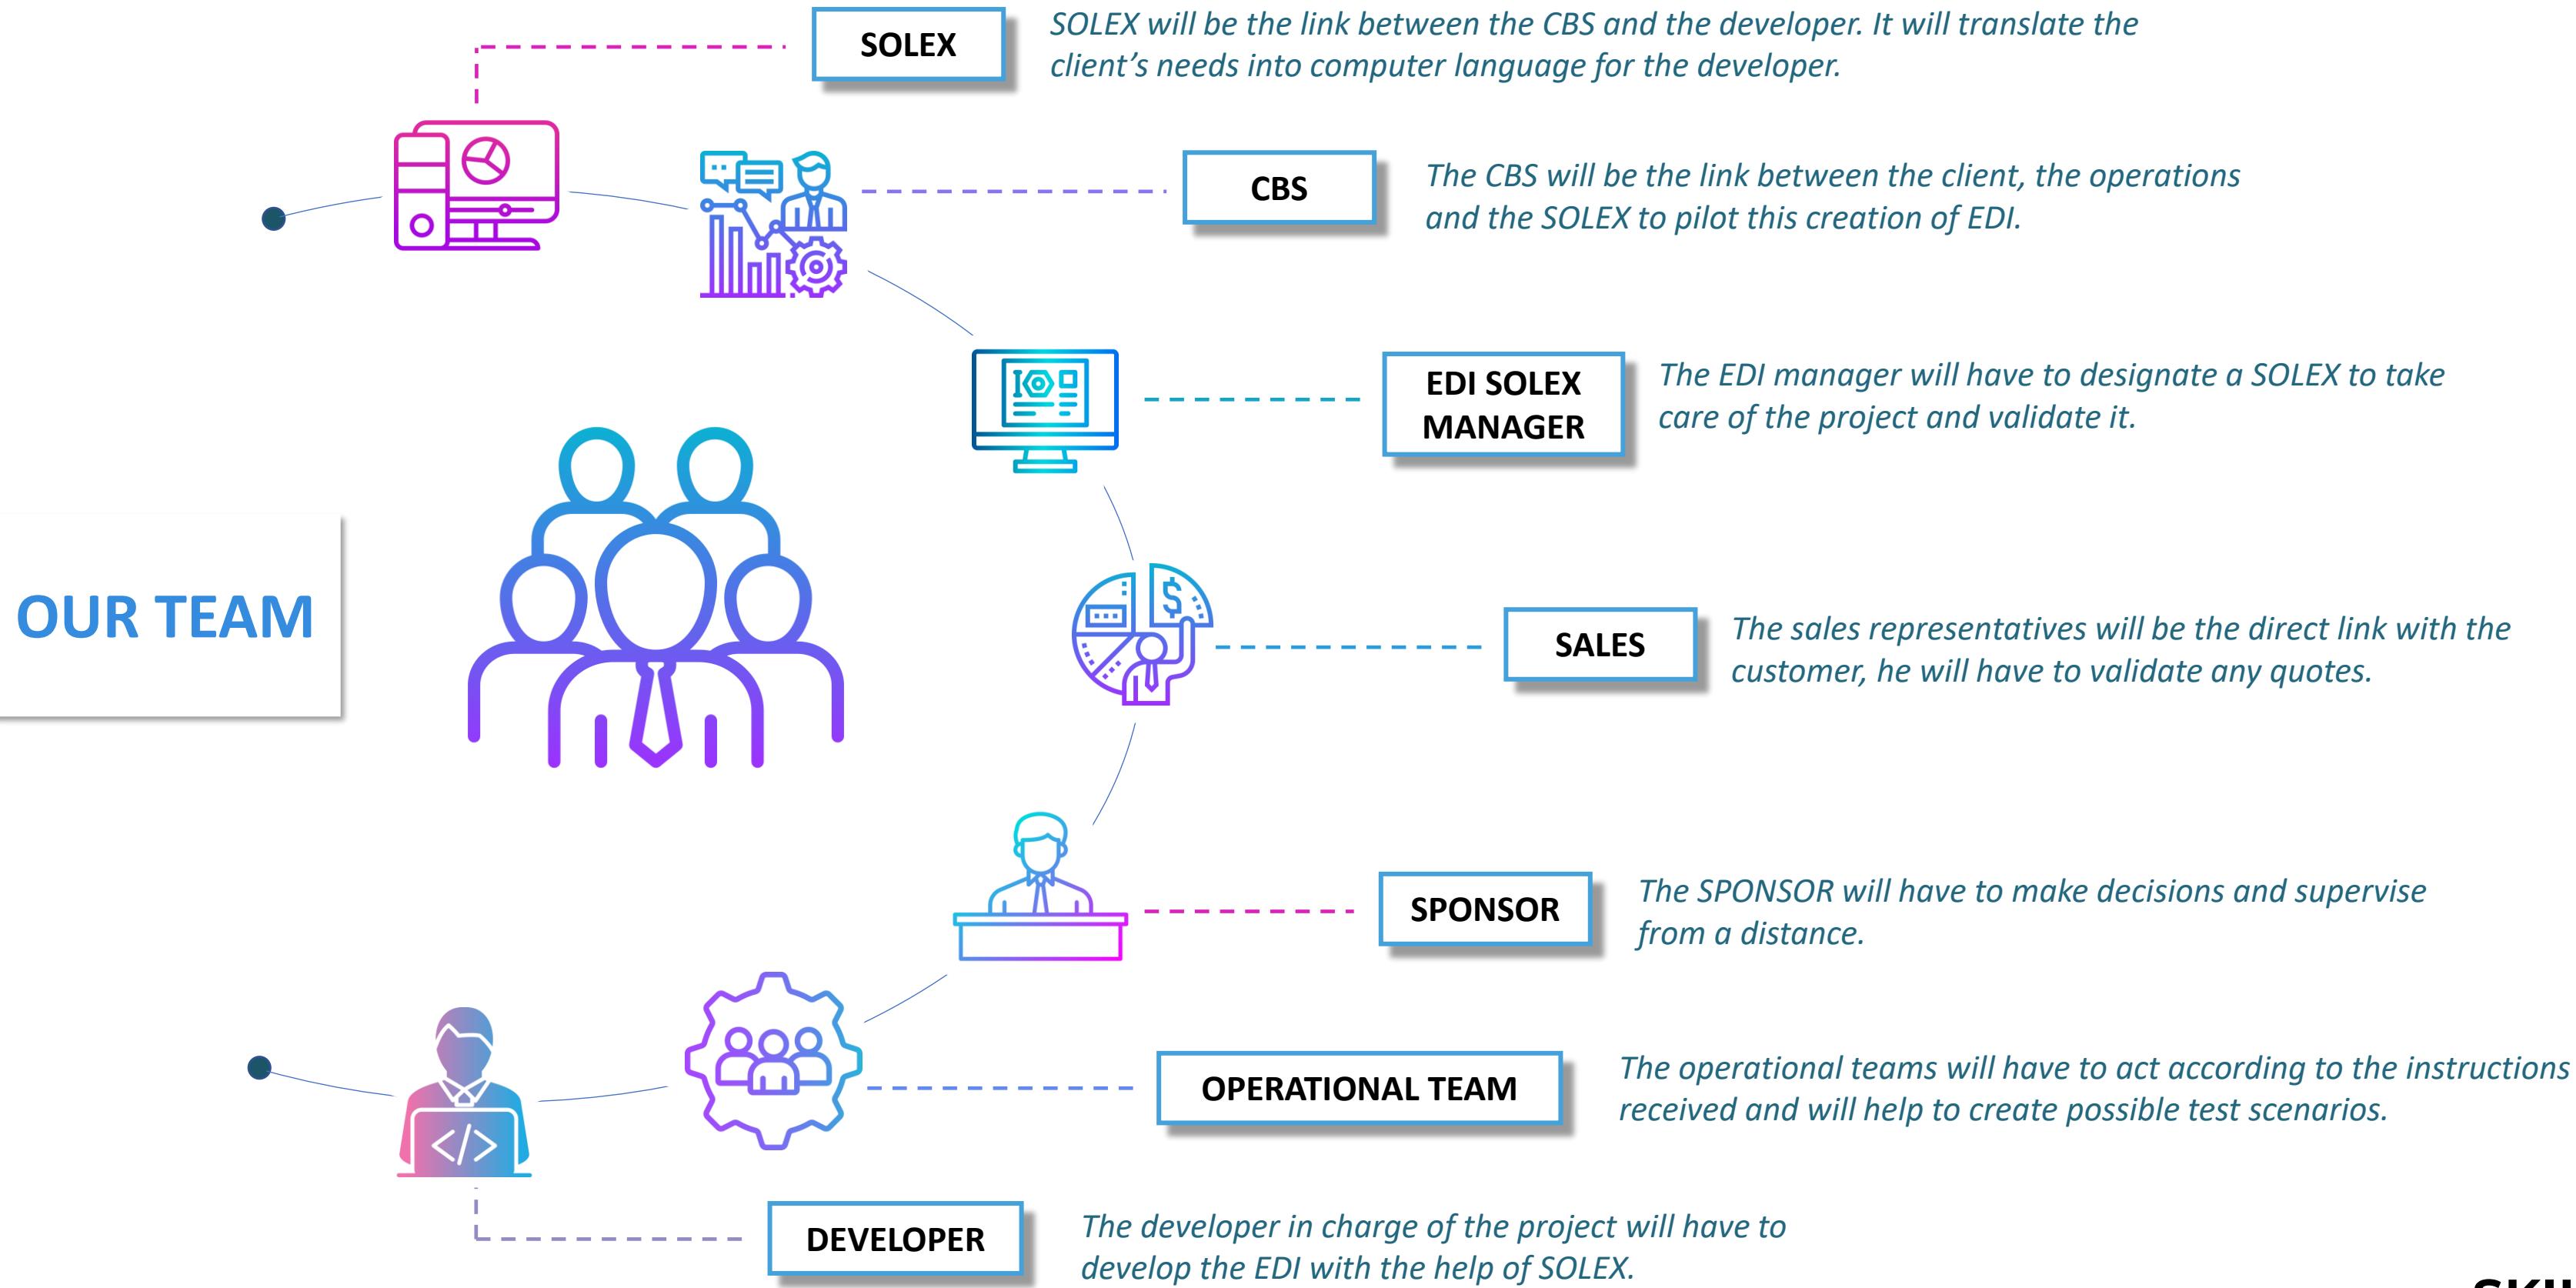

Activity at shutdown in case of breakdown

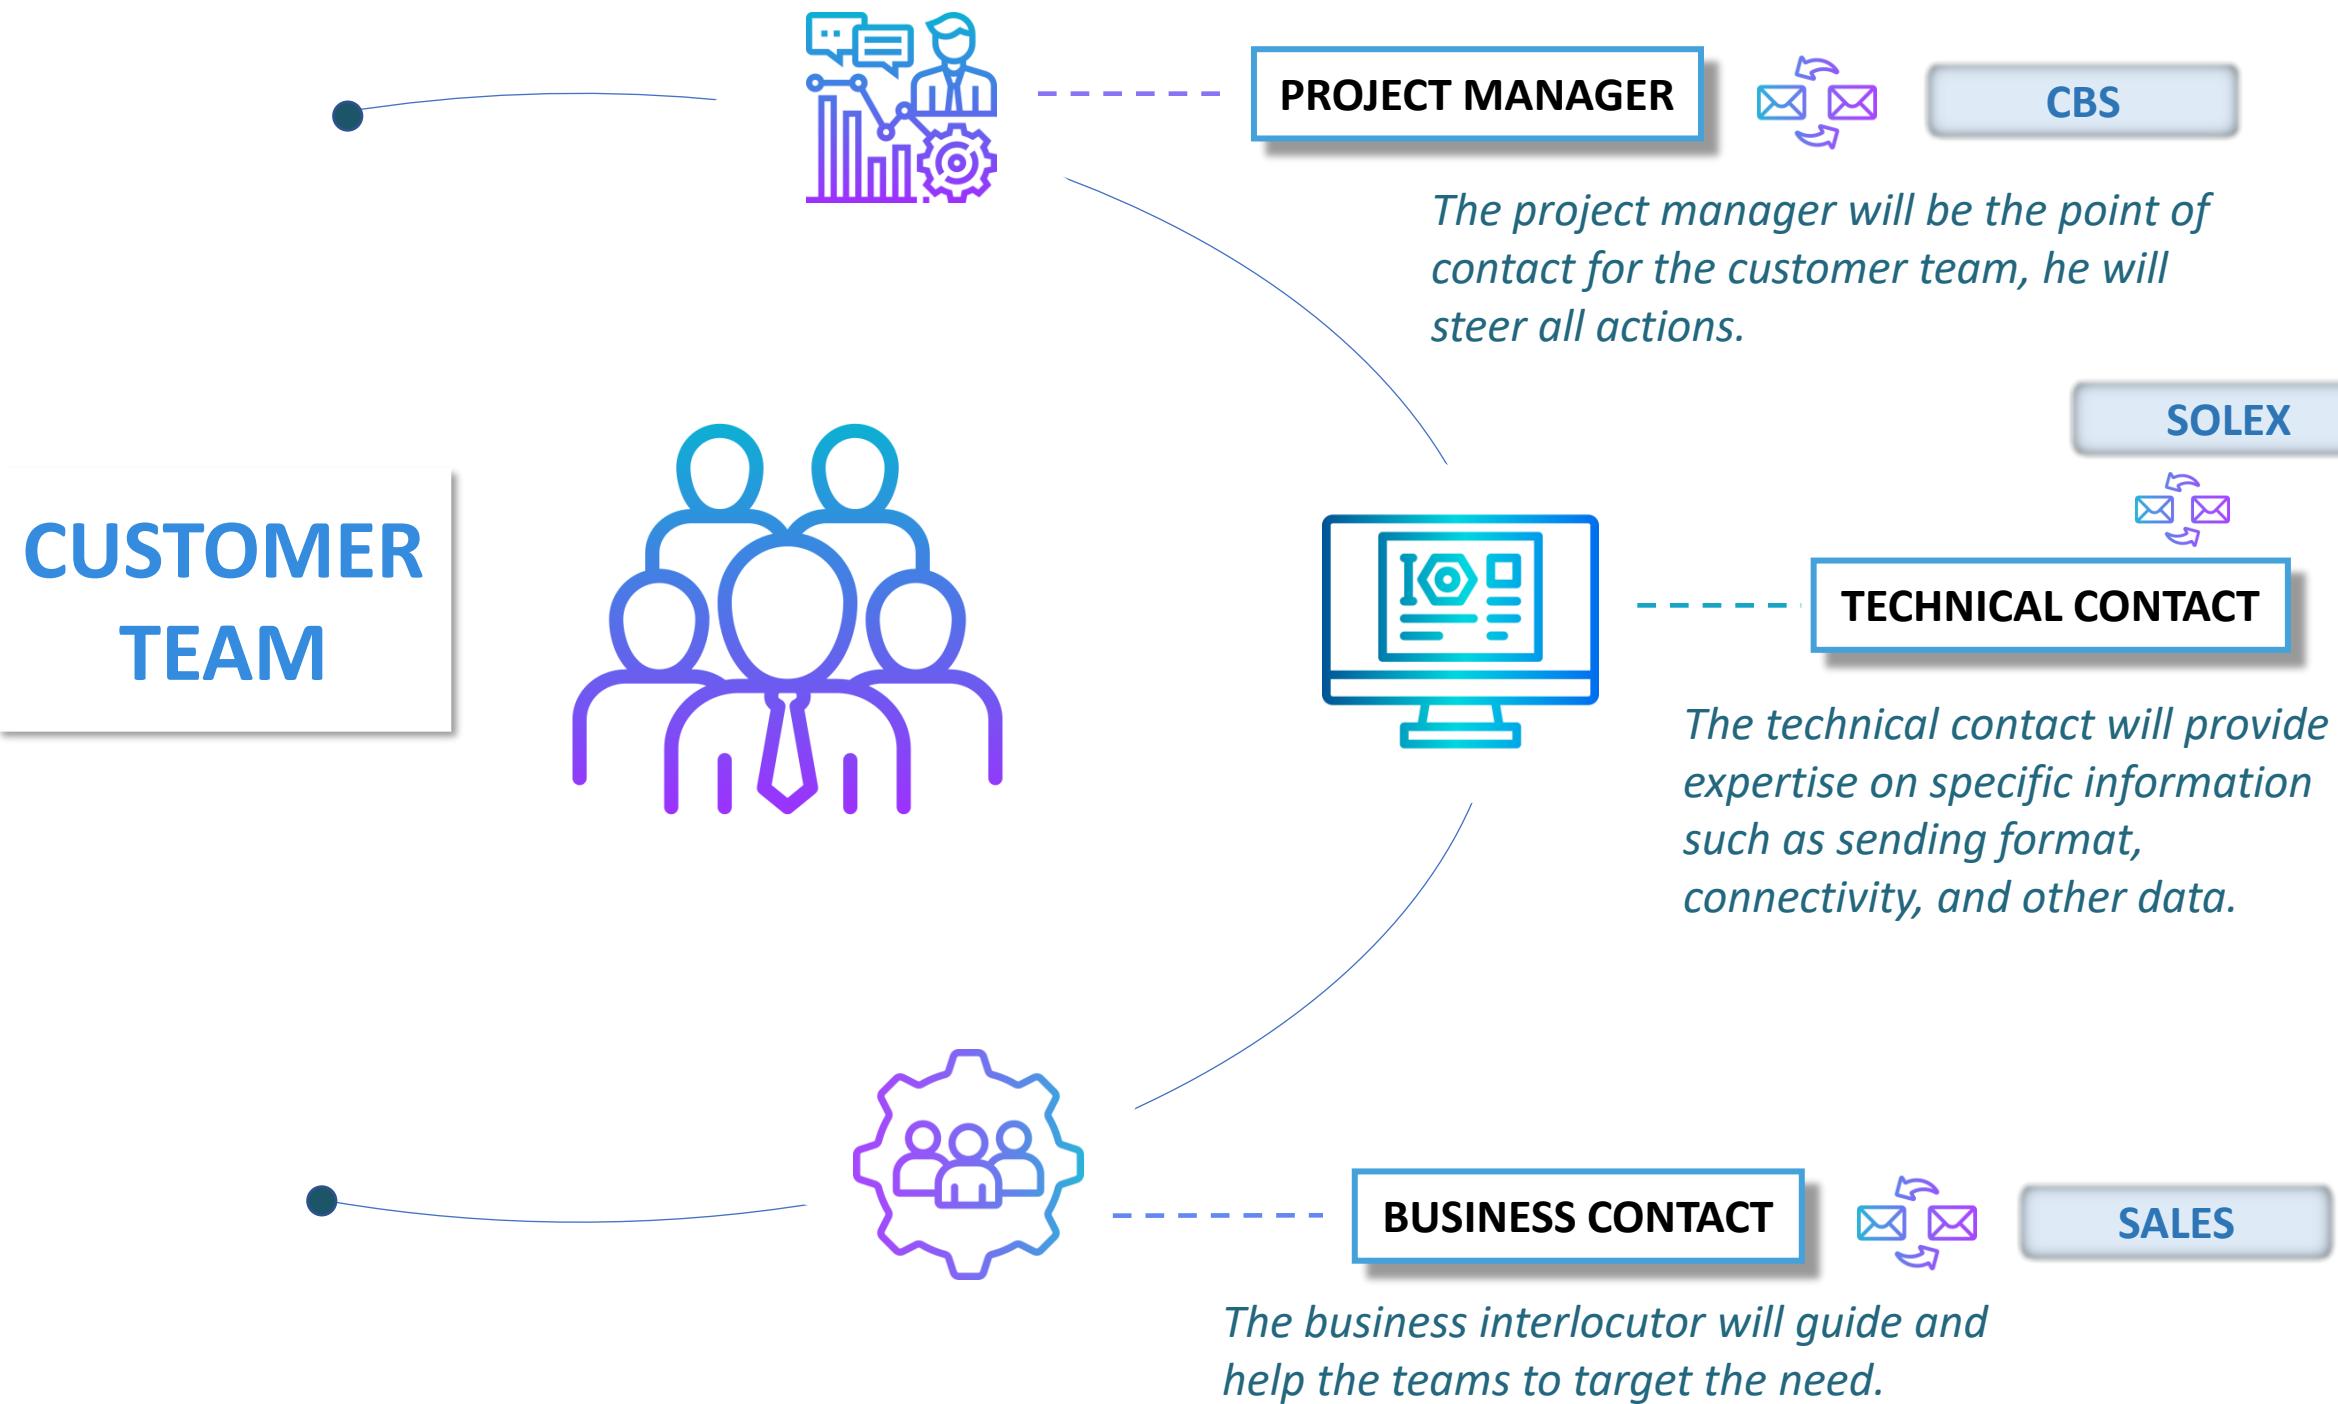

KEY STAKEHOLDERS

In the process EDI creation

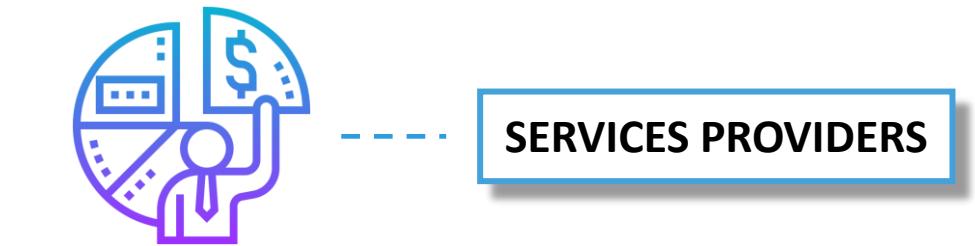

PROJECT'S STAKEHOLDERS | Internal Stakeholders

PROJECT'S STAKEHOLDERS | External Stakeholders

EXTERNAL SERVICE PROVIDERS MAY BE INVOLVED

External stakeholders may be solicited, as this intermediary could manage EDI on behalf of a company.

SUMMARY

You now know the essential information of an EDI.

The customer's need will define what type of EDI to choose.

This solution is beneficial, it will allow all customers a better monitoring of activity, a better productivity, a better reliability of information and more important securization of data.

You can continue with the module!

A futuristic, glowing blue cityscape with a drone on a circular platform.

KEEP GOING !
